Dear Hiring Manager,

I'm a UI/UX Designer with an Honours Bachelor of Design in Interactive Media from Seneca Polytechnic. I specialize in creating thoughtful digital experiences and visual communication through user interface design, graphic design, visual systems, and interactive media.

Throughout my education and professional experience, I have developed a strong foundation in both design strategy and visual execution. I enjoy taking complex ideas and turning them into clear, engaging, and visually cohesive experiences—whether that means designing a digital product, developing a visual identity, creating promotional content, or building a structured design system.

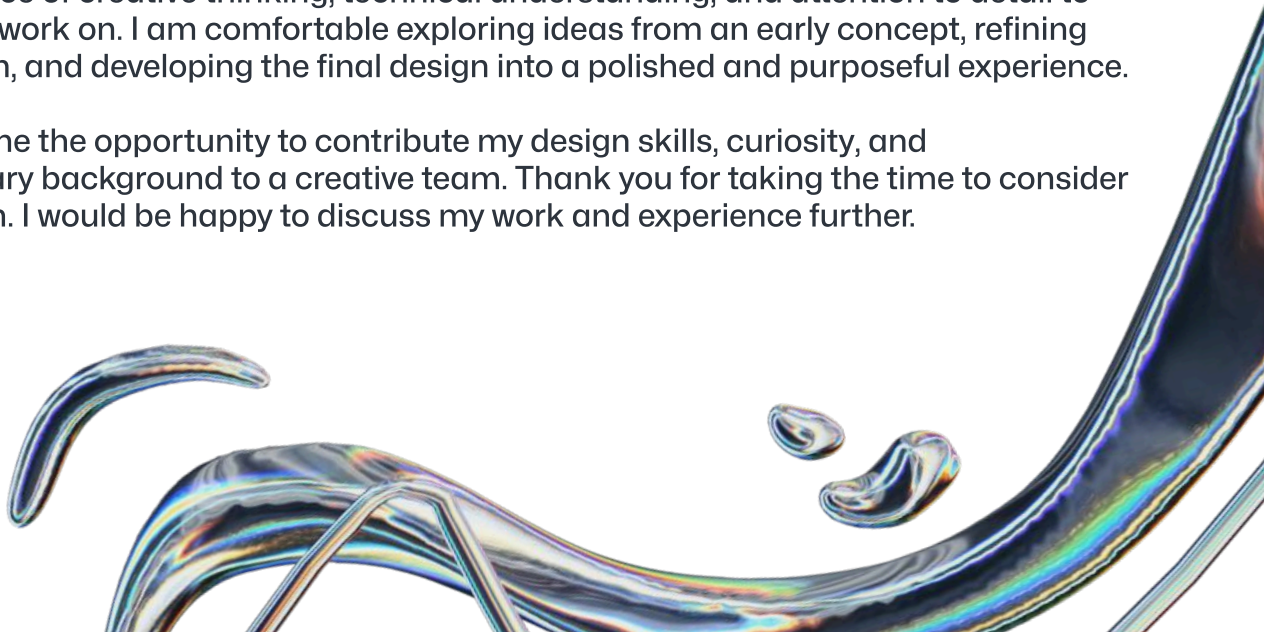

During my Co-op experience as a UI/UX Designer at Inspired Technology, I worked on digital experiences for a couch-surfing platform, contributing to interface design, visual systems, and reusable design components. This experience strengthened my ability to design within an existing product ecosystem while considering consistency, usability, and the needs of both users and developers.

My Interactive Media education also gave me experience across the broader design process, including Figma, Adobe Creative Cloud, prototyping, design systems, typography, layout, user research, usability testing, motion, and front-end fundamentals. More recently, my portfolio work has allowed me to explore the relationship between design and development through projects focused on structured handoffs, component systems, and digital experiences.

I bring a balance of creative thinking, technical understanding, and attention to detail to every project I work on. I am comfortable exploring ideas from an early concept, refining visual direction, and developing the final design into a polished and purposeful experience.

I would welcome the opportunity to contribute my design skills, curiosity, and multidisciplinary background to a creative team. Thank you for taking the time to consider my application. I would be happy to discuss my work and experience further.

Sincerely,
Ayub Mahdi

Ayub Mahdi | Graphic Designer UI/UX Designer

Graphic Designer and UI/UX Designer with an Honours Bachelor of Design in Interactive Media. Skilled in Figma, Adobe Creative Cloud, design systems, typography, layout, prototyping, and user-centered design, with experience creating cohesive digital and visual experiences.

Experience

Inspired technology | UI/UX Designer

5, 2025-8, 2025

Designed UI/UX mobile screen for their couch surfing app, Worked on the Logo, and along side the design system to create majority of the pages for the app.

Poster Designer | Product Designer

6, 2023

Working with my local mosque Khalid-bin Al Walid, I applied typography, layout, and colour theory.

Canada's Wonderland | Ride Operator

5, 2024-8, 2024

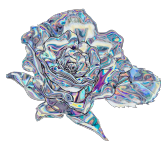

Working in fast paced position while also ensuring the safety of riders by following procedures. Also being great with guest support as many issues occurred daily and needed solving.

Seneca | Program

1, 2023-4, 2026

Throughout my 4 year program, I learned so much on design, animation, coding, entrepreneurship, and more. I've gained experience through course assignment, Co-op placement, and prof and mentor guidance. All preparing me to join the industry with a well equipt skillset.
